

GUYA BLUMENTHAL

Designer
(Milano, Italy)

I'm an Industrial designer specializing in CMF design. I studied my Master in CMF design at POLI.Design by Politecnico di Milano, and my B.A. in Industrial design at Shenkar College of Engineering, Design and Art in Tel-Aviv, Israel. I bring with me 4+ years professional experience of designing and developing products.

I believe that good design comes from observing the world, gathering inspiration from everything around us, both good and bad, and recognizing what and how to use it in a clever and strategic way into your own design.
